2.0 Dataset Overview

This data set contains the 5-minute resolution observations from the Automated Surface Observing System (ASOS) network of ~860 stations (Fig. 1) in the contiguous United States. These data were collected and archived by the National Centers for Environmental Information (NCEI; formerly the National Climatic Data Center).

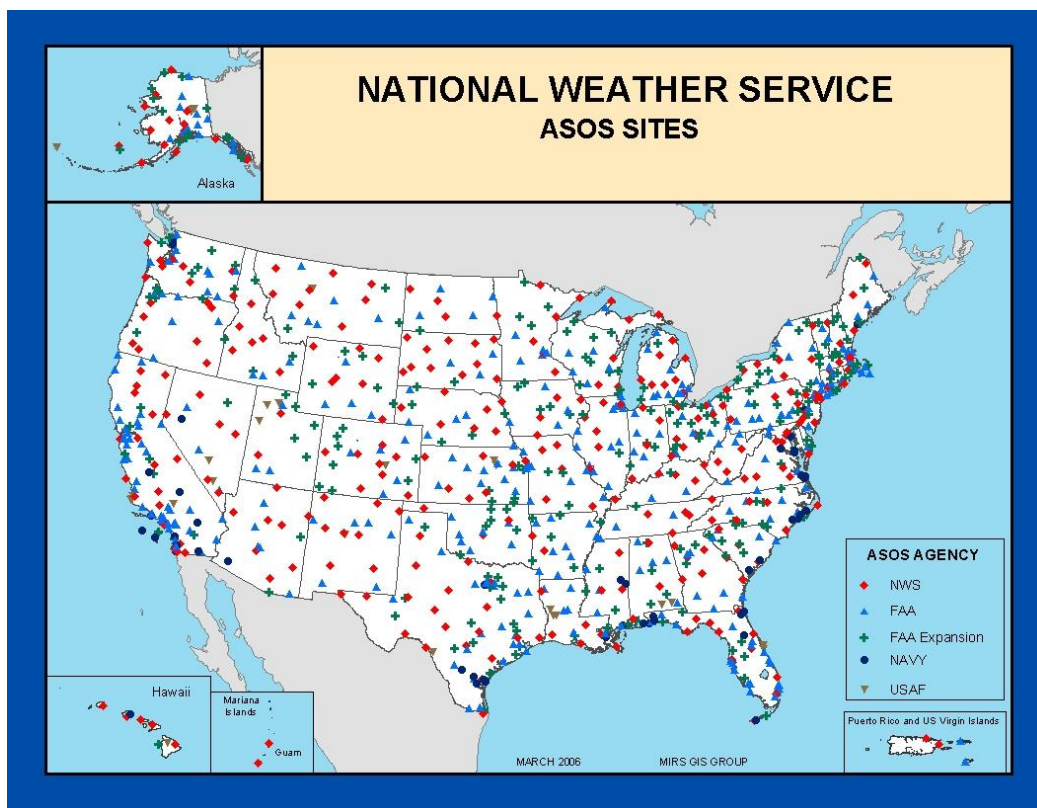

Figure 1. Map of ASOS locations (only those in the contiguous US are included in this data set).

3.0 Project Overview

The **Verification of the Origins of Rotation in Tornadoes EXperiment-Southeast (VORTEX-SE)** is a research program to understand how environmental factors characteristic of the southeastern United States affect the formation, intensity, structure, and path of tornadoes in this region. VORTEX-SE will also determine the best methods for communicating forecast uncertainty related to these events to the public, and evaluate public response. For the 2016 field season a large array of fixed and mobile ground instrumentation were deployed around Huntsville, AL from 1 March to 1 May 2016. Further information on VORTEX-SE is available at the VORTEX-SE web site at NCAR/EOL: https://www.eol.ucar.edu/field_projects/vortex-se and information on the VORTEX-SE 2016 deployments is available at the VORTEX-SE Field Catalog: http://catalog.eol.ucar.edu/vortex-se_2016.

4.0 Data Format Description

The 5-minute ASOS data are in monthly tar.gz files follow the naming convention:

V-SE_2016_ASOS_5min_6401_201603.tar.gz

6401 signifies 5-minute data

201603 is the four digit year and two digit month

Each tar file contains a file for every station that follows the naming convention:

64010KWST201603.dat

6401 signifies 5-minute data

KWST is the call sign for the station

201603 is the four digit year and two digit month

The file format for the 5-minute ASOS data can be found in the td6401.pdf file that is included with this data set. At the time this readme was created this document was available from NCEI at:

<http://www1.ncdc.noaa.gov/pub/data/documentlibrary/tddoc/td6401.pdf>

5.0 Data Quality Control Procedures

These data are provided as is, no quality control procedures were conducted by NCAR/EOL.

Information on the ASOS algorithms and sensor specifications is available in the ASOS_Users_Guide_199803.pdf and ASOS_Users_Guide_Appen.pdf files

that are included with this data set. At the time this readme was created these documents were also available from the National Weather Service at: <http://www.nws.noaa.gov/asos/pdfs/aum-toc.pdf> and <http://www.nws.noaa.gov/asos/pdfs/appen.pdf>
